

Wine barrel DIONISOS

Foil "little wine barrel", product labels for the taps and glass are not contained in the scope of supply.

Beverage system for red wine, white wine and rosé wine.

The housing consists of plastic, scratch-resistant and unbreakable, and looks like a lying wine barrel.

Standard delivery is 3 flavor, the necessary flavor is committed later by customer himself. The professional rapid-valve is responsible for a perfect dispensing.

The differently long cooling coils provide a subtly differentiated cooling of the various sorts of wine. With the thermostat the bar temperature of the coolest drink (in this case the white wine) is steered.

The wine barrel is offered in the basic colours black, brown and dark-green, including the suitable decoration strips.

Further color variants are available on request according to chromatic chart RAL.

The plastic corpus offers sufficient place for advertising and product notes. Decoration stripes, taps, drip bowl and drink tubes, are contained in the scope of supply.

Technical Data

Electrical connected loads	240 V / 50 Hz / 1,6 A / 190 W
Cooling capacity	465 W / 400 kcal/h
Ready for draw	5 Minuten
Drawing capacity	40 l/h bei delta t 10 K
W / D / H	308 / 410 / 408 mm (W with drip-tray: 580 mm)
Head	255 mm
Weight	27 kg
